COR BRAID 8X

Cor-Braid é um multifilamento de 8x produzido com os melhores materiais garantindo assim a melhor qualidade e performance durante todo o tempo.

A nova tecnologia "duracolor" assegura uma grande durabilidade na sua cor, as fibras são tingidas ao mesmo tempo que são trançadas, garantindo maior absorção da cor.

Cor-Braid is a 8-ply braid produced with top quality raw material which ensures quality and performance over time.

The "duracolor" technology ensure maximal color durability, fibers are dyed being braided, thus guaranteeing greater color absorption.

FLUOROCAST

100% FLUOROCARBON

150m

 Fluorocast é conhecido por ser um dos melhores Fluorocarbon do mundo, a sua resistência linear e ao nó é surpreendente. Um fio que afunda 4 vezes mais rápido que as linhas de nylon, pouca elasticidade e completamente invisível na água. Fabricado com uma rigidez ideal para "leader" e garante o diâmetro correto e redondo.

0.40	15.900kg
0.42	17.000kg

Fluorocast is known to be one of the best Fluorocarbon in the world, its linear and knot strength is surprising. Fast sinking, low elasticity and is completely invisible in water. Made with ideal stiffness for leader line and guarantees the correct and round diameter.

Este especial Fluorocarbon coated foi concebido especificamente para o Surfcasting, garantindo maior distância de lançamento, alta resistência à abrasão, uma força extraordinária ao nó e ainda uma suavidade extra.

This special Fluorocarbon coated is especially designed for Surfcasting, guaranteeing a longer casting distance, high abrasion resistance, super knot strength and extra smoothness.

É sem dúvida o fio revestido a Fluorocarbon mais resistente do mundo, teste e verifique a sua sensibilidade, resistência ao nó e abrasão e ainda a sua baixa memória. A seu incrível revestimento garante uma durabilidade extra, tudo isto torna este "Fluorocarbon Coated" o mais completo do mercado.

Surely is the most resistant Fluorocarbon coated in the world, test and verify its sensitivity, knot and abrasion strength, low memory. The incredible coating guarantees an extra durability, Spirt is the Fluorocarbon coated most complete of the market.

Winner é a combinação da mais recente tecnologia de extrusão com os melhores copolímeros que permitiu desenvolver o fio de maior resistência linear e ao nó disponível em todo o mercado. Uma linha altamente sensível e macia, sem memória, resistente à abrasão e totalmente transparente.

Winner using the ultimate extrusion technologies and the World best copolymer it was possible to develop this high strength monofilament (both in linear and knot strength). This line has a great sensitivity and softness, no memory, abrasion resistant and exception transparency.

Provavelmente o mono mais resistente do mercado

CORMOURA.COM

RIO DOURO

Serie de canas em 2 elementos fabricadas em fibra de vidro maciço.
Uma das canas mais fortes e resistentes em todo o mercado do seu segmento.

Ref.	Sec.	Action:	Size(mt):	Weight
M2101270	2	40-120grs	2.70	730g
M2101300	2	50-150grs	3.00	815g
M2101330	2	50-150grs	3.30	950g

2 section solid fiber glass rod.
One of the strongest rods in the market

TROUT

Serie de canas em fibra de vidro maciço.
Trout tem a fibra vincada para poder lançar as amostras sem qualquer tipo de torção dos passadores, uma forma de atingir distancias que raramente se consegue.

Solid fiber glass rod designed to optimize the casting
